

# Selection, Presentation and Publication of Papers

The Symposium will have both stand-up presentations of contributed papers and poster presentations. In addition, several keynote lectures will be delivered by prominent researchers on radiative transfer.

All keynote lectures and contributed papers will be published by Begell House, Inc., in a Proceedings volume and will be available in the form of CD-ROM to the participants at the registration. A set of keynotes and contributed papers will be selected for post conference publication in a special issue of the Journal of Quantitative Spectroscopy and Radiative Transfer.

Symposium will include poster sessions to allow the researchers to discuss their most recent work in a relaxed atmosphere. The abstracts of these papers will be included in a Book of Poster-Session Abstracts. Full papers are not required for the Posters.

All authors are expected to send their manuscripts (or abstracts for the poster presentations) in camera-ready format (in pdf or as a MS-Word document) electronically. The guidelines for preparing camera-ready manuscripts can be found here.
